Performance Review Policy

Overview

SWS AI conducts structured performance reviews to recognize employee contributions, identify growth areas, and align individual goals with company objectives.

Review Cycles

Performance reviews are conducted twice a year:

- Mid-Year Review: July
- Annual Review: January

Probationary employees receive a review at the end of their 3-month probation period.

Review Framework

Performance is assessed across 5 dimensions:

1. Technical Competency – Skill level and quality of work.
2. Ownership & Accountability – Taking responsibility and delivering results.
3. Collaboration & Communication – Teamwork and cross-functional effectiveness.
4. Innovation & Problem Solving – Bringing creative solutions to challenges.
5. Growth Mindset – Commitment to continuous learning and improvement.

Rating Scale

Ratings are given on a 5-point scale:

- 5 – Exceptional: Consistently exceeds expectations.
- 4 – Strong: Frequently exceeds expectations.
- 3 – Meets Expectations: Consistently delivers what is expected.
- 2 – Needs Improvement: Partially meets expectations.
- 1 – Unsatisfactory: Consistently falls short of expectations.

Self-Assessment

Before each review cycle, employees complete a self-assessment form in the HR portal. This covers accomplishments, challenges, areas for improvement, and goals for the next period.

Goal Setting

Following the review, employees and managers collaboratively set SMART goals (Specific, Measurable, Achievable, Relevant, Time-bound) for the next half-year.

Performance Improvement Plans

Employees rated 1 or 2 will be placed on a Performance Improvement Plan (PIP) with clearly defined improvement targets and a 60-day timeline. Failure to meet PIP targets may result in role change or termination.

Promotions & Increments

Annual increments and promotions are tied to the Annual Review. Exceptional performers (rating 5) are eligible for fast-track promotions. Increment percentages are determined by budget and performance rating.
